

Available only through  
licensed producers

## JaMur Zoysiagrass Characteristics

---

- Attractive blue-green color.
- Medium leaf blade.
- Produces a very dense turf canopy.
- Extensive root and rhizome system.

## Improved Plant Vigor

---

- Good shade tolerance.
- Good cold tolerance.
- Minimal thatch production.
- Extensive root system allows for excellent recovery.

## Cultural Practices

---

- Suggested mowing height 0.5–2 inches.
- Uses one to two pounds of nitrogen per 1000 feet using split applications in spring and late summer.
- Once established, water only as needed.

## Certified Purity & Uniformity

---

- Zeon is licensed in the Southeastern U.S., Hawaii, and Australia exclusively to The Turfgrass Group, Inc. and its sub-licensees.
- JaMur is available only through a select group of licensed certified producers.
- JaMur is grown & sold under a rigorous set of rules & guidelines designed to promote on-going quality, purity, and uniformity.

## State Certification

---

- Certification is the only method of assuring the consumer is receiving the variety they purchased.
- JaMur can only be produced and sold as a Certified turfgrass variety, unlike many other varieties.
- Certification agencies in each state inspect all JaMur production fields regularly, protecting the interests of the consumer by providing a third-party system of quality control.
