licensed producers

## TifBlair™ Certified Centipede Grass Technical Data

---

### TifBlair Certified Centipede Characteristics

---

- The first and only Certified Centipede.
- Produces more stolons and more leaves.
- Slow growing.
- Late season color retention.

### Improved Plant Vigor

---

- Performs well in acidic soils.
- Greater cold tolerance than other centipede varieties.
- Deep rooting.
- Minimal fertility requirements.

### Cultural Practices

---

- Suggested mowing height 2".
- Apply approximately 1" of water per week.
- Apply between 1 – 2 pounds of nitrogen (N) per 1,000 square feet annually, during growing season.
- Only herbicides labeled for use on centipede should be applied.

### Certified Purity & Uniformity

---

- TifBlair Centipede is licensed in the southeast exclusively to The Turfgrass Group, Inc. and its sub-licensees.
- TifBlair Centipede is available only through a select group of licensed certified producers.
- TifBlair Centipede is grown & sold under a rigorous set of rules & guidelines designed to promote on-going quality, purity, and uniformity.

### State Certification

---

- Certification is the only method of assuring the consumer is receiving the variety they purchased.
- TifBlair Centipede can only be produced and sold as a Certified turfgrass variety, unlike many other varieties.
- Certification agencies in each state inspect all TifBlair production fields regularly, protecting the interests of the consumer by providing a third-party system of quality control.
