licensed producers*

TifGrand Certified Bermudagrass Characteristics

- Dark green color.
- Fine leaf blade (dwarf classification).
- Reduced fertility requirements.
- Superior turf quality in full sun.
- Late season color retention.
- Can only be produced as Certified.

Improved Plant Vigor

- Thrives in 60%-70% shade (5 hours direct sun).
- Good cold tolerance
- Excellent Tawny Mole Cricket resistance.
- Superior rhizome and stolon production.
- Since 1997, it has undergone 19 tests at universities in independent trials.

Cultural Practices

- Suggested mowing height 1/2" - 1 1/2 ".
- 20-25 lbs. N per acre or 1/2 – 1lb N per 1,000 square feet every four weeks depending on growing season once established.
- Maintain high levels of K (up to 1N:2K) throughout the year, with special emphasis during late summer and fall.
- Gradually raise mowing height in the fall as night-time temperatures are approaching the low 50°F.

State Certification

- Certification is the only method of assuring the consumer is receiving the variety they purchased.
- TifGrand can only be produced and sold as a Certified turfgrass variety, unlike many other varieties.
- Certification agencies in each state inspect all TifGrand production fields regularly, protecting the interests of the consumer by providing a third-party system of quality control.
