

Saving America's Water

In just 4 years, over 500 million square feet of TifTuf has been installed on residential and commercial landscapes, golf courses, and collegiate and professional sports fields across our country. As a result, over 9.5 billion gallons of our precious water resources have already been saved. TifTuf is absolutely changing the face of the American landscape!

Making a big splash with very little water.

Requiring 38% less water, TifTuf is redefining drought tolerance. In four years of National Turfgrass Evaluation Program drought stress trials, it outperformed Tahoma 31 and all other tested bermudagrass cultivars hands down. In fact, with the sale and installation of over 500 million square feet in just the past four years, TifTuf has saved over 9.5 billion gallons of one of our most precious natural resources, our Water!
